#### **DETAILED ACTION**

## Request for Continued Examination

1. The Request for Continued Examination filed on 8/25/03 (RCE) under 37 CFR
1.114 based on parent Application No. 09/559,704 is acceptable and a RCE has been established. An action on the RCE follows.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 16, 25, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson (US 2,502,117).

Anderson discloses a method for forming carton blanks comprising advancing a web of paperboard 39 along a path; progressively applying, with an adhesive, at least one ribbon of reinforcing material 42 with a width less than the paperboard; the paperboard is then cut into individual carton blanks and then are formed into cartons for receiving articles (see figure 1).

4. Claims 1-3, 11-16, 25-29, and 34 are rejected under 35 U.S.C. 103(a) as being anticipated by Stone (US 5,551,938).

Stone discloses a method for forming carton blanks comprising advancing a web of paperboard 42 along a path; progressively applying, with an adhesive, at least one

ribbon of reinforcing material 38 with a width less than the paperboard substantially overlying a selected panel portion; the paperboard is then cut into individual carton blanks and then are formed into cartons for receiving articles (see figures 1-3). Stone teaches manufacturing a paperboard carton with a reinforcing collar made of "either paperboard, thick paper... or flexible plastic." (column 4, lines 48-49). Therefore paperboard trim, cull, etc. is considered Stone anticipated.

#### Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson (US 2,502,117).

Anderson does not directly disclose printing indicia on the ribbon, however the examiner takes OFFICIAL NOTICE that it is well known in the art to print indicia on at least one ribbon of reinforcing material before adhering it to the web of paperboard.

7. Claims 4-7 and 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stone (US 5,551,938) in view of Stokes (US 1,880,288).

Stone does not disclose a plurality of reinforcing ribbons, however Stokes teaches reinforcing carton blanks with ribbons t (see figures 1-1a). It would have been obvious

Art Unit: 3721

to one of ordinary skill in the art to use the teachings of Stokes in the invention to Stone

in order to reinforce more than one side of the carton.

Response to Arguments

8. Applicant's arguments with respect to claims 1-7, 9-16, and 25-34 have been

considered but are most in view of the new ground(s) of rejection.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.
